Publicado:
10 Enero 2023

The latest issue of the COAC journal, *Quaderns d?Arquitectura i Urbanisme*, **?L?ofici de pensar? (The craft of thinking)** is available for COAC members.

Under the direction of architects **Joseph Ferrando** and **Marta Poch**, **issue 273** aims to reflect on **the role of architects** in building habitat and architectural thinking as they go through the project process.

Using a scientific approach and organised around five methods, the publication analyses

the processes of a total of **25 architecture firms** in the pre-crisis and post-crisis stages in order to identify their creative map and how they approach architecture in the current context. The following architecture firms are included in the journal: 300.000km/s, Aixopluc, Arquitectura?G, Arquitecturia, Barozzi Veiga, Anna & Eugeni Bach, Bosch Capdeferro, Carles Enrich Studio, DATAAE, Albert Faus, Flexo, Goig, Grau Casais, HARQUITECTES, López Rivera, MAIO, Mendoza Partida, Mirla, Lluís Ortega, PERIS+TORAL, Núria Salvadó, Unparelld?arquitectes, Jorge Vidal, Ferran Vizoso, Vora.

In order to provide a more cross-cutting view of the Catalan architectural scene, the volume also includes contributions from **5 global critics** from academia and **5 local critics**, who will offer a synopsis of what **5 different generations** of Catalans brought to architectural thought. The contributors include names like Philip Ursprung, Beth Galí and Arturo Franco, among others.

***Quaderns*at home**

You can pick up this issue of the journal from our various Association branches, or ask for a copy to be sent you along with your next order from La Cooperativa Jordi Capell. You can also read it **online.** [2]
