The **AVANTGUARDA cycle**, curated by Anna Castellà, from Arjub, concludes the **cultural program** that has included several meetings in the Seu's event hall.

The content of the cycle has been divided into four main sections: environmentalism, experimentalism, communicationism and academicism. The format of these four sections and on different days has been that of a conference, a debate group and a masterclass, per month.

This cultural program has been promoted by the board of the **Demarcation of Tarragona of the College of Architects of Catalonia**, with the support of the Open Center of Architecture, with the aim of showing the new realities facing the 'architecture and thus be able to reason about which aspects are priority in a climate emergency context, while generating spaces for debate with various topics.

With more than 25 speakers from local and European architects, a cycle has been formed, under an argumentative thread, with the desire to generate a shared and intergenerational learning space, which has sought to stimulate the links between architecture and society.

Now you can relive the AVANTGUARDA cycle by viewing the recorded sessions on the COAC Tarragona YouTube channel. We will update the news with the available videos.
