On 27 May, the Girona regional branch of the Architects' Association of Catalonia hosted the awards ceremony for the 24th Architectural Awards of the Counties of Girona, one of the province's most prestigious cultural events in the field of architecture and construction.

The event, now back to its traditional format after two years online, was presided over by Sílvia Musquera, member of the COAC Cultural Committee for the Girona branch. Over the course of the evening, awards were presented to **16 prize-winning projects**: 15 selected by the jury in the categories of **Architecture, Interiors, Landscapes** and **Temporary Structures**, plus the **Opinion Award**, decided by the public voting for their favourite from the 119 project entries.

The jury, made up of architects **Isabela de Rentería**, acting as president, and board representatives **Montse Nogués** and **Marta Benedicto**, highlighted the close links the selected projects established with the relevant locations and local residents and their synchronicity with sustainability criteria, not only as something supplementary to the architecture, but as a fundamental premise and guiding principle.
